Solves bending problems other tools can't even attempt.

DIAMOND®

**DBR-25WH
 Rebar Bender
 & Straightener**

This electric/hydraulic rebar bender and straightener help to save valuable man-hours by cleanly bending or straightening bent rebar. It also functions as a simple 90-degree portable electric rebar bender. Its interchangeable die covers rebar diameters from 1/2" (#4) to 1" (#8) grade 60 rebar. Maximum pressure for bending and straightening ranges from 8.5 to 11 tons. It's portable & versatile enough to bend or straighten rebar in-place with its push/pull hydraulic capabilities. Bends a 90 degree angle in only (4) seconds. Pull, push and bend rebar with this tool. The bending head also rotates 360 degrees.

Specifications on DBR-25WH #8 Electric Rebar Bender and Straightener

Max. Rebar Dia.	1" #8 (25mm) Grade 60			
Rebar Diameter (Dia.)	Straightening rebar capacity (in degrees)		Bending angle capacity (in degrees)	
	Push	Pull	Push	Pull
1/2" (13mm)	Up to 125	Up to 121	Up to 94	Up to 92
5/8" (16mm)	128	124	90	90
3/4" (19mm)	130	126	90	90
1" (25mm)	132	124	90	90
Max. Pressure	11 tons	8.5 tons	11 tons	8.5 tons
Output	1.5 HP			
Power Supply	Electric motor 100v/115v/220v/240v –12 amps			
Weight (kg)	Tool only 57.3 lbs. (26) Shipping Weight 67 lbs. (31)			
Dimensions (mm)	25.75" x 10.50" x 7.80" (660 x 270 x 200)
